# 2016 CQWW DX CW Contest QRM

## DX QRM

OPERATING ON AND OFF, SMALL EFFORT, POOR CONDX BUT GOOD FUN...**2E0SDV**. My First major CW contest. Thoroughly enjoyed it...**2W0WOD**. K3 + EXPERT 1K-FA + BAZOOKA...**3Z0X**. TNX all best 73 cu Used IC-745 100W and GP antennas 160-80m 40m and 20-10m GP Very sorry not have cat on my radio. Very old radio IC-745...**4K6FO**. QRV only 14hrs...**4L2M**. Another great CQWW DX CW contest despite the very high QRN...**4M5EN**. Finally, the WRTC 2018 qualifications are over. Although 10 was almost dead, 15 also marginal, I had fun with some short but nice runs. TU Ranko for offering his super 4O3A station. Ivo I79A3A, E73A...**4O3A**. QRP rig, only CW, 10m-2W, 15m-3W, 20m/40m-5W, 80m-2W, DELTA LOOP 84m/3m up Keyer K16(K1EL), Begali Simplex Basic IAMBIC paddle, 600m/asl...**4O4SM**. BigIR vertical and wire from balcony to ground for 160m Pwr abt 600-700W...**4O7CC**. First time...**4Z5OZ**. Tough to hold your own in pile-ups for intercontinental multipliers!...**4Z8SM**. K3 power 50W Used only one rig Dipole QTH: Saitama-city Saitama-pref...**7K1CPT**. I enjoyed the contest...**7K1MAG**. Checklog...**7K1PTT**. I enjoyed the contest...**7K1SLY**. I enjoyed the contest...**7K1VKU**. Getting worse year by year...**7K4QOK**. Thank you very much for very nice contest...**7L3SQL**. I joined this contest for the first time. IC-7000M, 50W, 12mH Mobile Whip...**7L4FCN**. I enjoyed the contest...**7M4AOE**. Log For Checking...**7N2AIA**. Condx for EU was good...**7N2TRM**. I enjoyed the contest...**7N4GIB**. I enjoyed the contest...**7N4QCQ**. This is my 30th CQWW-CW Contest!...**9A1AA**. Spent Saturday on building the vertical...**9A4QV**. FIRST LICENCE 17-06-2014...**9A6TT**. I declare that I was working in accordance of Contest rules and HAM-spirit!...**9A704DC**. Yaesu FT-107M and Alpha Delta DX-EE on 3.5MHz...**9A7DD**. Tnx for nice contest. Qsl via SV2AEL 73s...**9H1AE**. My Rig Yaesu FT-1000MP and VL-1000 Quadra Linear @ 400W Antennas @ 27m (HF) 2-el Lightning Bolt Quad (LF) Butternut HF2V 15m was my most productive band. Openings on 10m but low activity. The 20m driven element on my Quad went open circuit overnight on Saturday/Sunday which had a big impact on my final score! Many thanks to the organisers. 73 to all from Borneo...**9M6XRO**. Solid long-term backing by H. E. Sultan Qaboos A41AA and his top management team of ROARS including Abdi A41JT and Abdalla A41KB with their organization team members made this fantastic club station at A47RS a reality. Kudos and hats off to the terrific work done by ROARS Technical and Contest Manager Adnan A41LP and his dedicated technical team in just the past 1 month to get this station in shape for this first tremendous outing in the contest world. Special mention must be made of the team members including A41PK Fahad, A41PG Ameen, A41OP Sami, A41KT Hamed, and A41KQ Ali. This station with the contest call A44A is going to create many a "Storm in the Desert" in the contesting world in future. This is just the beginning folks! Solid performances were contributed by all members of the operating team racking up a great score with team guidance & contest strategy by Prasad A45VA (VU2PTT) and terrific operating by veteran Mohib A41JZ, San A45WH (VU2WH), Pai A45VI (VU2PAI), and "Mult Specialist" Paul A45VB (G7SLP) who kept jumping between the 2 mult stations. Special mention must be made of the support team who would just sit with us right through the contest - some full time - some coming and going every now and then throughout the contest while keeping us well fed and really taken care of. Thank you guys, you know who you are :)

Station- 4 operating positions, 2 Run and 2 Mult stations A47RS Club Station Equipment- 4 x Kenwood TS-990, 4 x Acom 2000, or SPE-2k Amp 4 x MicroHam Microkeyer II 4 x MicroHam Station Master Plus 8 Ant x 4 Radios Switching matrix from MicroHam 4O3A High Power filters for all bands + stubs Hardware interlocks by Prasad A45VA (VU2PTT) Tx Antennas- 160m - Top-loaded T on Spiderbeam 26m pole by San A45WH 80m - 2-el phased verticals by Paul G7SLP on Spiderbeam 18m poles 40m, 20m - 2-el 40m, 4-el 20m @ 20 metres up 20, 15, 10m - 3-el 20m, 4-el 15m, 5-el 10m @ 20 metres up Rx Antenna- 160m and 80m - Remote tuned N6RK loop presented by Prasad A45VA (VU2PTT) on behalf of the VU Contest Group A44A expects to be make a lot of noise and QSOs in future contests. Look out for them on 160m during this season in different contests. Thanks to all who stations who called in and made this first operation of A44A a grand success. Pileups were huge and if we did not hear some of you, we hope we make the QSO next time. 73 and see you all down the contest logs. For Team A44A, Prasad A45VA (VU2PTT). NOTE: For contest organizer, 3 out of 5 total operators were from VU Contest Group. Home calls are added to operator list to be able to easily search for our records in the future...**A44A**. Very enjoyable with some good and surprising openings...**A45WG**. DATE OF ISSUE FOR MY HAM RADIO LICENSE IS 10-MAR-2015 (ROOKIE)...**A61EK**. The condx was better than Phone contest. But we have operated MULTI-OP/SINGLE-TX by only two men. That was the minimum number of operators in our experience...**AH2R**. Neighbor grow light ballast RFI/magnetic storm this year...**AL7LO**. 2014-06-13...**BD7IAL**. 2016-09-13...**BD7LNI**. 2015-05-17...**BG6SZD**. 2016-06-27 B class Licence...**BH1RWJ**. 2016/01/27...**BH6KOK**. 2014-7-1...**BI4SHV**. Feb 2016...**BI4SWR**. Much better conditions than for the SSB contest. I had some fun!...**C44C**. Thanks to 5B4XF for hosting me! Great contest!...**C4W**. Once again, I felt very happy, Thanks to the CE3AA...**CE3AA**. A lot of fun despite tough conditions and technical glitches. Thanks to EA8 teams for competition. TNX to Yuri RL3FT and Serge RU3RQ for technical support More info at [www.cn2aa.com](http://www.cn2aa.com) (to be updated)...**CN2AA**. Working only Sunday and only few hours but a lot of fun 73s...**CN8WW**. QTH was the island of Corvo, CU9, Azores. I used vertical dipole, K3 and PA...**CR2V**. A huge satisfaction to participate in this world competition...**CR5K**. Licenced 09 January 2014 as CR7AJL...**CR5U**. ON 2016-12-20 16h11 rcvd email fm CQWW.COM asking for a log. XCVR KX-3, PWR 5W. Ant endfed hanging vertical on fibre fishing rod. Ant was hanging in front of apt building - looking to the west...**CT7AGR**. RIG Icom IC-7300 ANT Dipole PWR 100W...**CT7AIX**. Lousy propagation...**CU9AB**. Perfect training for two young operators to meet the best in the best contest...**CX1AA**. IC-718, ANT DIPOLE 3.5Mhz...**D1M**. From DL1KSE: There were problems with the amplifier, it was not really possible to use more than 100W of transmitting power. And some problems transmitting on 40m occurred, although initially there were no problems. Band conditions were relatively poor this time, no opening on 10m. The setup at DBØRC improved. Again very nice hospitality by the clubstation owners. From DL8RDS: Operating from DBØRC, club station on a mountain in northern Bavaria. Diesel generator failed, so we used a normal gas generator with 2kw, eating up 25 liters of fuel, however only in periods because of ignition spark QRM. For the heating we burned 100kg of wood, giving us t-shirt temperature inside the station

---

house...**DBØRC**. Nice activity. Enjoyed SO2R. 24h is enough for a single op...**DC4A**. Nice contest, TNX and see u next year. Vy 73 de Manfred...**DC9ZP**. Kenwood TS990s JRL2000F, G5RV, Spiderbeam, Winkey2, N1MM+...**DD4DA**. Only limited time due to family obligations. RIG: K3 100W, HD-4 OCF-Dipole @ 10m, UCX-Log...**DF3IR**. Hi! Of course bad conditions! Running 100W to wire-antennas. Thank you to all stations who logged me...**DF5BM**. My first single band 80m attempt using K3/100, Dipole and home made L-Antenna. I expected a bit more DX using 100W instead of QRP, hi...**DF5RF**. Sorry, some frequencies of Station 1 may not be correct. Bands are of course...**DG5E**. Poor condx for wire antennas - just 80 and 40 well during morning...**DH6DAO**. ICOM IC-7800, ACOM2000A, 750W, Optibeam OB17-4, 80m + 160m Inv V Dipols...**DJ1AA**. Thanks for this nice contest. It was fun to work so much DX...**DJ3AK**. QRP 5W from FT817 via tuner Z11 to antennas 80m, 40m off-center-fed dipole FD3, 21m long, 8m high 20m, 15m 2-el Mini-Yagi MFB23, 11m high...**DJ3GE**. KX3, 10W, Dipol...**DJ3XA**. Priority for 40m band points. Worked K3LR again as in every contest...**DJ4WT**. Nice contest only the ops are even worse then in SSB part were they go up a little if one ask them nice in CW they do not understand a simple question. New multi on the band and nobody isn only calling Hw about Ham spirit? Like dogs running after a fox "oh lord please let me be the first!" Thanks this beep contest is over :- ) Cu Next year...**DJ5AN**. QRV just for fun pick up multipliers conditions always difficult in central germany 73...**DJ6OI**. Very poor Condition during the whole test in North Germany!...**DJ6TK**. FTDX-3000, 3-el beam Dipol 100W...**DJ6UP**. SORRY FOR BEING LATE. TNX FOR YOUR REMINDER. HAPPY NEW YEAR!...**DJ6XB**. Only S&P SD Log BAVARIA CONTEST CLUB...**DJ6ZM**. Crazy crazy crazy...**DJ7MH**. Poor condition!...**DJ9CN**. TNX! It was great fun :)...**DKØTU**. Enjoyed my very first CW Contest since 50 years :)...**DK1IP**. RIG: IC-756 5W out Magloop indoor...**DK1IZ**. Interesting conds, 40 and 80 full open, low bands coming back, soon we'll have also 160...**DK1NO**. 10m nil, only few QSOs with W stations — low score 73 Hans...**DK3YD**. Great contest due to method of scoring...**DK4LX**. Kenwood TS-870 CPA Eagle vertical Dipol FD4 LW micro Keyer II...**DK4VY**. It was NOT easy this year. Nevertheless, it was fun anyway...**DK5D**. Checklog...**DK5JM**. Lousy propagation for getting through with QRP...**DK7OG**. Yes, condx go down. In spite of much more QSOs than expected, I finished with 100 multis less than 2015, and more than 200 less than 2013. On 10m just a few QSOs on Saturday, none on Sunday. Thanks to all who picked up my mediocre signal!...**DK8NT**. Part time :)...**DK8ZZ**. Many thanks for everybody who spent time to hear me...**DL/HA5VJ**. Super contest. I have only little time to work :(...**DL/SP2UUU**. K3/100 80/40 Dipol 20-10Hexbeam...**DLØDIX**. TRX: FT-950 ANT: L, 27m up...**DLØM-CM**. Condx going rapidly down - 10m was virtually non existent...**DL1A**. TRX: Agronaut 2 from TEN-TEC 5W Dipol 160/80m, Loop 30m, 20m, 15m 3-el Yagi 10m Portabel QTH: Ostseebad Boltenhagen 10m band not open in contest...**DL1AQU**. 50W and LW 54m...**DL1CC**. Checklog please...**DL1KWK**. FT2000 + Acom1000, 2\*18m-Dipol...**DL1NEO**. Checklog...**DL1NOD**. Some QSOs only...**DL1SBF**. This year 100W and only a long-wire, so we have 160m as well...**DL1YCF**. TRX: TS-2000 PWR: 100W ANT: FB-53, FD4, GP...**DL2BUM**. Great contest! 73s de...**DL2LDE**. I decided to stick with one of the less busy bands, and that with a simple wire antenna, so I'm sure this is one of the shortest logs you'll have to evaluate. Well, at least my old straight key was up to the job, and I did not need to type in so many QSOs, which in these days of short deadlines is something of a blessing...**DL2LFH**. SORRY FOR LATE LOG!...**DL2RU**. Best thrill was working KC1XX at 1222 and ja3ybk at 1238 local!...**DL2SAX**. TS 850 S - 2x 19, 5m -

Doppelzepp - HÄ\_hnerleitung...**DL2ZA**. Hard job with only 5W on a 2x8.5m vertical Dipol...**DL3NGN**. No serious participation, just to see how the antenna works...**DL3RAH**. Again it was fun to be part of the contest and to meet old friends on the air!...**DL4AAE**. Trcvr FT 817, Indoor Ant, 5W...**DL4EPM**. Earlier HB9CSA and then DL4FDM :-)...**DL4FDM**. IC-7410, 100W, deltaloop...**DL4FN**. Not too much time, only a shorty G5RV, but it was a pleasure!...**DL4HBF**. TNX to Hava, DO5HO, and Stefan, DI6LSM, for support...**DL4LAM**. My trusty K2/100 feeding a custom QW-Vertical in the backyard did great...**DL4TJ**. TS-50 50W Antenna...**DL4XU**. Yaesu FTDX3000 - SteppIR - Vertical 8meter - long Wire 60m long...**DL4ZA**. CQWW CW Contest is the best, thanks for a great weekend. See you again next year...**DL5HF**. K3 + KPA500 + Mosley MP33 + AV640 GP + Dipole 40/80m. Bad Condx on Sunday...**DL5JQ**. TRX ICOM 756proIII, ANT: TA53M, FD4 and Inv V...**DL5ZB**. Sorry I had not so much time so I worked the SB 80m. Condx on the low bands where vy nice. Thanks all how give me a call with my low signal. 73 cu Mel...**DL6CT**. TS120V ant. LW20M...**DL6EDD**. My first cqww dx cw contest!...**DL6GCE**. TRX: FT-950 ANT: L, 27m up...**DL6KWN**. Just doing some practise with miw2 software...**DL6SDA**. Poor condx + small antennas = hard work...**DL7ALM**. Great contest, thanks to copy my qrp signal...**DL8TG**. Thanks all stations for contacts, see you next time...**DL8UKW**. FT-2000, Expert 1.3K Fritzel GPA-30, Double Zepp...**DL9GTB**. Thanks for the contacts! 73! Klaus...**DM3XI**. Great contest, many thanks!...**DM5N**. I was happy about the dxcc score but condx were not the best. Only 14 Ws and 4 JA. My antenna was a simple INV L with 4-el radials but QTH is excellent. Cu agn next year. 73 Olaf...**DM7C**. 2016...**DO2MIT**. IC-730, end-fed hw ant, straight key (exhausting)...**DO7CED**. The QTH of DP1POL is Neumayer Station, Antarctica, Grid Locator IB59UH. Conditions were rather poor this year, 20m and 40m were the only bands that opened up at all. I spent a lot of time calling not to miss those elusive band openings. Nevertheless, I always enjoy giving out the CE9 multiplier. I got very few requests to repeat the zone this year, so my callsign seems to have made it into most of the multiplier lists available. Now I just cannot wait for all those sunspots to come back!...**DP1POL**. Some unexpected family commitments - cu next year...**DR3W**. 73...**DU7HF**. I was operating only 160m this contest. Sadly lightning shut me down both nights and I managed only 11 contacts before having to disconnect the antennas due to local thunderstorm activity — next time...**E51AND**. Checklog...**E74SL**. FT817 and multiband dipole...**EA1AER**. Operation at EA1FDI location, great station and antenas. Thanks Javi...**EA1DAV**. Great contest, bad propagation for me in 10m...**EA1GT**. FT817 + indoor multiband antenna...**EA1ITC**. ICOM 706 MKIIG dipolo DX-B Alpha Delta o hy gain avq 14...**EA2DDE**. SINGLE-OP SINGLE BAND ASSISTED 15M LOW POWER CW...**EA2DT**. Bands behaved as expected for this time of the solar cycle. 10m F2/Es propagation was almost absent. High band rx antenna didn't work well, need to fix that for the next one. Exciting and sportive EU dogfight with ES9C and 9A7A on cqcontest.net online scores. Thanks guys for the show...**EA2EA**. Thanks to all Operators. Coax trap dipole in window. See you in 2017...**EA2GM**. A DX party!...**EA3BRL**. I miss 10m propagation, only a few qsos, but fantastic all ways. Thanks! 73...**EA3FZT**. Sorry by delaying. My PC gone QRT...**EA3QC**. See you next year! RIG - Icom IC-706MKII PWR - 80W ANT1 - 10/15/20 m - ECO AVT vertical ANT2 - 40/80 m - homemade dual band wire dipole...**EA4DXP**. Best 73 de David...**EA4SG**. Tnx for contacts in my first CQWW CW 73s...**EA5FIV**. 100W, Inv V for 7 Mhz tunable all bands. Enjoyed the test. 73s all...**EA5IHK**. Moved station to a new QTH and just started building antennas the day before the contest...**EA5RS**. Elecraft K1, Inverted V (APEX 4m AGL)...

**EA6/E71DX.** SCORE 15,326...**EA6AJ.** As usual problems. That time with the amplifier. They QRMed 59+ on 80 & 160m. Fortunately was discovered before the contest. I disconnected and LP mode again. It's a real challenge LP on LF. The only key for that it's: Patience, Patience and clear freq to be hear. No way with pile-ups. It's better to return when everyone is tired to call. Fortunately some new slopers and good conditions let me to work more than I thought, even Pacific on right window time. Thanks all 73s Mike...**EA6SX.** Canary Island Gran Canaria AF-004...**EA8/DDØVR.** TNX all participants, 40/20/15m best few 80/10m most all American continents, Europe hard. FT-897D/ZS6BKW...**EA8/HB9FIH.** YAESU FT-897D DIPOLE WINDOW 80W...**EA8AQV.** You have to read the rules carefully before you start. No PC at home and I remembered (wrongly) that for the CLASSIC the operating time was 25 hours. A pity since I got two nice multipliers at that time, hi! You have to correct this. At my age (73) it is nice to be able to compete without feeling the pressure you are used to have when competing...**EA8CN.** Rig: Elecraft KX3 5W out, ant Dipole...**EA8EW.** Station Description: TX/RX: FT-897D (±100W output); Ant. G5RV Jr + 80-meter loading coils, 5-meter high over a 8-story building; Logging/Keying: NA software + home-made Accu-Keyer...**EA8NQ.** I hope CU in the bands next year 73 de Jesus...**EC1KR.** This time the team from ED2C used the special call sign ED2RA in memoriam of Gonzalo EA2RA who passed away this last year. Good operator and best friend will be hard to forget. The contest went well on Friday night and Saturday, turning a bit worse on Sunday with noiser bands and shorter and unstable propagation. Huge RF returns from 40m vert ant fried the relays of 2 PAs making a bit harder the contest operation. Later, 80m dipole went crazy until the coax was changed. But finally all was solved. New operators on the team, which target is mainly waking the interest on contesting more than achieving amazing results. See you all next year and thanks for Qs and Pts!...**ED2RA.** Lousy propagation. 5W into a vertical is hard...**EE2A.** SD WinKey K3 P3 4-SQ...**EI5DI.** Good conditions need more time and better low band ante...**EI5KG.** ICOM 706MKII 100W IV DIPOL...**ER5DX.** Rig Yaesu FT-897D, PWR 5W, ANT 43m long EZ-Wire key - straight key manufactured for Soviet pioneers Very nice contest, made now my first QSOs on top band - each QSO is a new DXCC! :-)...**ES5TF.** TRX - FT0-840 ant - Delta Loop 168m...**EU6AA.** Used FT990 100W + 2x41m Zepp...**EU6DX.** 73...**EU8A.** 73...**EU8F.** TNX & 73!...**EW1AFM.** 100W...**EW6FW.** Good contest!...**EW7M.** Good contest...**EW7RA.** TNX...**EW8DX.** 73!...**EW8G.** 73! TNX...**EW8OM.** Thanks all for good contest!...**EW8R.** IC-746 pro...**EX8BN.** QTH: Poitou-Charentes...**F/G4BJM.** Too bad 10m was closed this year. Last year's contest brought me many new ATNOs...**F4GFT.** RIG:Yaesu FT817 PWR: 5W Ant: LW (80m) - Quad skywire (40m) - portable delta loop 1-el (20m)...**F4GOU.** First license obtained in November 2015...**F4HPX.** Elecraft K2- 5W - ANT: Vert. Gap Titan...**F5IQJ.** Always a pleasure to participate 73 Fred...**F5NBX.** Bad 10m in Europe...**F5NKX.** Less qso than last year. Less sunspot and murphy put high swr on 20m. But still a good weekend...**F5OWL.** IC-703, K3/10, 5W spiderbeam, 40+80m lambda/4 vertical, 160m invVee...**F5VBT.** Not a serious effort due to leaving hospital the friday afternoon, enjoyed what i managed to work. Thanks to all and see you in the next contest...**F5VLY.** Checklog. No time to participate this year...**F6GCP.** Proud to give you: 140 cw-QSO. Going better with time. Merry Christmas, HNY2017Daniel/F-IN97TK, 73...**F6GEU.** Station: Yaesu FT-991 / Multiband dipole antenna / No QSO on 80m and 160m...**FH/HB9AMO.** Good conditions, except on the first night...**FY5KE.** Great contest...**GØAZH.** Enjoyed the few hours that I did...**GØDAY.** Very poor HF condx, managed no QSOs at all on 10m this year...**GØHDB.** Poor conditions but enjoyed myself all the same. I will be back

next year to have another go...**GØHSA.** Great...**GØMCV.** Good to be able to take part, even if operator and band conditions were not as good as they once were!...**GØMTN.** FTDX5000, 100W, Hexbeam at 16M high. Really tough going with 100W due to poor conditions...**GØTSM.** The usual fun, but very limited time to operate this year...**GØVDZ.** COULD ONLY MANAGE A FEW HOURS THIS YEAR, STILL FUN THOUGH...**GØWAT.** Great fun and good CW practise :)...**G1SCT.** SD worked well...**G3GLL.** SD LOGGER WORKED PERFECTLY...**G3KKP.** 10m-only entry gave me plenty of free time...**G3LDI.** Condxs fair, 20m was closing quite early in the evenings for QRP working, bit of a challenge this year with the poorer condxs, quite a few stations sending at nearly unreadable speeds which is not giving the newer contester a chance. Cu next year 73 Derrick...**G3LHJ.** Terrible conditions gave up after first day...**G3PJT.** Limited operating time, but very enjoyable...**G3Q.** Checklog as requested...**G3RAU.** Even with the harder conditons enjoyed operating...**G3RTU.** Hope these contacts were useful 73 Paul...**G3SEM.** Nothing on 10m, S&P here, less horrible signals than last year I think. 73...**G3VYI.** Not able to put in time with a QTH move...**G3YBO.** Conditions quite poor with very little dx to be worked on QRP Rig Elecraft K2, 5W. Antennas 75ft longwire, Hustler 4BTV...**G3YMC.** I wasn't planning to put in a log for a few QSOs. This can be used as a checklog if it is late...**G3YRZ.** Excellent though Ws were weak this year. No ZLs here...**G3ZGC.** Propagation fascinating. Very variable over time. Path to Caribbean sometimes very good. Northern US and Canada very challenging from Europe. Too many ultra-fast CW senders. This is just antisocial. There should be an upper CW send speed limit, or unassisted stations are disadvantaged...**G4CWH.** Conditions on HF poor but 160 & 80 good. Had to repeat my call for many stations! Some just ignored the correction...**G4DDL.** Hard work with a low inverted-vee dipole, centre at 10Mtr and 90W...**G4EBK.** Significant reduction in conditions from last year. Also suffered a 1 hour power cut!...**G4FKA.** First ever QRP contest for me since licensed in 1973. I enjoyed it!...**G4HYG.** Band very noisy here on top band. Still a lot of bullies around particularly when trying to work DX!...**G4L.** First time for this contest. 10W...**G4OZG.** FTDX5000 ACOM1000 BUTTERNUT 9CV VERTICAL 80m DOUBLET...**G4RKO.** Part time effort this year...**G4U.** Rig died before the contest. Used old IC751 & had to send manually...**G4WQI.** TS430S and inverted v doublet at 23 Foot centre struggled a bit to work multipliers...**G4XHE.** Rough. Not even a half-hearted effort from me. Conditions way down...**G7PVZ.** Log for CQWW DX CW contest for checklog as requested...**GDØAMD.** Decided to go for a single band entry this time due to other commitments over the weekend. Not the best year for QRP, to say the least but "being the DX" sure makes the contest more fun. Once again, happy to represent Jersey during CQWW CW. See you next year. RIG: KENWOOD TS 590 Dialed down @ 5W ANT: OPTIBEAM OB11-5 @ 45ft (3-el on 20m)...**GJ2A.** Submitted for checking following email request 5-JAN-17...**GMØHUU.** One of the best contest. Conditions not brilliant this year...**GM3A.** 10m non existant 15m Poor...**GM3WIJ.** Great Fun! Can't wait till next year. BILL...**GM4M.** FT-1000MP mark v field, Antenna dipole @5m up...**GU3HFN.** Poor conditions but great fun...**GU4CHY.** Checklog only...**GWØRYT.** Just starting over after a 14-year break. Tried my new Doublet Antenna and 100W, nice to hear some familiar call signs. See you next time with a proper entry...**GW4BVJ.** This was a "See what you can do with a dipole at 30ft challenge" It turned out ok. Main thing is to turn up to the party even without your best outfit...**GW4J.** Hard from this north latitude...**GW5R.** 40m conditions were poor on Saturday but even poorer on Sunday! My score is half that of 2015 largely due to a lack of workable 3 point USA and Canada stations. Last year we had plenty! The poor prop-

agation was due to the high A index (in double figures all weekend) Outstanding signals were from the Caribbean. Antennas here inverted V dipole @ 30ft apex + 33ft quarter wave vertical with two elevated radials running n/s at 6 feet agl. Equipment Acom 1010 amp to 400W...**GX5TO**. For control only...**HAØIM**. RIG: FT-847, ANT: W3DZZ...**HA3FMR**. RIG: YAESU FT-2000, AMERITRON AL-811 AMP [PWR 400W OUT] ANT, H/M 5B. HF6V VERTICAL 73/DX, Joco...**HA3OU**. 1st day - 100W and 4-el Q 2nd day - 100W and 205BA Best regards from me to members of CONTEST COMMITTEE...**HA3UU**. I enjoyed the contest...**JS6SCC**. Band conditions were tough on 15 and 20 for my little portable setup - FT-817 and Buddipole vertical dipole. If the ionosphere was flaky, at least the weather in Hawaii was perfect for outdoor operation. Many thanks to the stations who had patience and good ears to pull me out of the noise!...**KH6BE**. THANK YOU TO ALEX, KH6YY, FOR HOSTING US AGAIN. CONDITIONS WERE POOR, ESPECIALLY ON 10M. WE HAD GREAT EFFORTS BY OUR TEAM TO GET EVERY LAST CONTACT WE COULD. LAST MINUTE SWR ISSUES ON THE 10M STACK FORCED THE USE OF A LOG PERIODIC. IT APPARENTLY DIDN'T MATTER MUCH THOUGH WE MISSED OPERATING ON 10M MOST OF THE FIRST DAY. THANKS TO ALL FOR THE QSOS. WE HAD FUN...**KH6J**. First trip to PR and a busy travel schedule so only packed dipole and K2- missed having the beam with the poor conditions on second day. Overall was a ton of fun and exceeded expectations. Thanks again to those that struggled through to hear my way-too-long-call in the muck. Gracias!...**KP4VE3RSA**. As expected, condx were very poor, also on 40m Still, enjoyed the contest!...**LA2AB**. CHECK-LOG...**LA4NL**. Only check-log. Worked from both holiday QTH and later part from home QTH...**LA5UF**. AS FUN AS ALWAYS - WHO SAID SUNSPOTS WAS NECESSARY?...**LA6CF**. Terrible condx up at 60 degrees North. First time in history that I didn't manage to work a single station on 10m! And only 58 QSOs on 15m! But still had much fun working this contest. Very hard to work US on 20m on Saturday. Heavy echo on all sta-

tions making it impossible to copy their callsigns unless they did reduce the speed. Had to give up several times. Some of them must think I am a fool that didn't get them in the log. But high speed CW and heavy echos does not belong together :) See you again next year. This is my favourite contest. 73 de Morten...**LB8DC**. Got my license January 2015...**LB8MG**. Attempted dual run, but it was only possible during certain times. Being this far South requires lots of CQs. The extremely high QRN levels made it impossible to hear the attenuated signals on 80 and 160. SOAB from LU without 10m in good shape and summer thunderstorms right over the station is not the best possible combination. Tnx everybody for the QSOs...**LP1H**. SB10 because of station limitations. CONDX were poor with just 2-3 hours per day of opening, TU for the good ears of the operators who gave me points. CU next year!...**LT7H**. First time in a big contest. Very happy with my performance. Greetings to all the participants. 73. Andres...**LU3HO**. IC 746 PRO Drake L7 Dipolo Rotativo 7 MHz up 40 foot...**LU3XX**. Wonderful as always, perhaps too many time with Davis Cup...**LU8EHR**. Checklog...**LX1EA**. 50% Bavarian Contest Club / 50% Rhein Ruhr DX Association...**LX7I**. CU next time...**LY3X**. SDR-1000 100W 2-EL DELTA LOOP...**LY5Q**. Commemorating 60 Years Anniversary of KTU Radio Club...**LY60KTU**. Very nice contest!...**LZ1DPN**. Very bad condx on 28MHz...**LZ1IA**. Tnx 73!...**LZ2OQV**. Big QRN on this band. HI...**LZ3PZ**. Hello, QSO outside 40m for check-only. Category band: 40m...**LZ5CA**. SRI For the late log...**LZ5Z**. RIG: SKY-SDR 5W ANT: VERTICAL 8M WITH AT130E...**LZ8U**. RIG FT-857D Antenna SOTAbeams Linked Dipole...**LZ8Z**. First use of IC 7300 in Contest. FAB! Wasn't QRV as long as hoped. MUST stop people phoning me and calling in over this weekend. Need a "Plague" notice maybe!...**M0ACM**. Lots of fun in a few few hours of S&P...**M0BPQ**. Reasonable conditions considering my meager setup. An enjoyable contest...**M0CVO**. 73...**M0IPU**. The weekend heralded a slight improvement in conditions on HF. It was a great experience to be involved in the "fast and furious"!...**M0NQN**. Always enjoy this contest but other priorities kept. Enjoyable but cond difficult...**M0OIC**. Great fun giving away a few points this year while improving my CW...**M0TEF**. Just a short/P entry from near home testing setup for DX trip...**M1K**. I only made a few contacts but it was fun all the same...**M1PTR**. The worst conditions for CQWW in a very long time...**M2G**. Great fun, not as good as last year on 80m. Hard to work the DX...**M3C**. SB 15M ASSISTED. BUT MANAGED A FEW QSOS. JUST. KPA500, N1MMPLUS...**M3I**. Disappointing conditions on most bands but they did improve on Sunday somewhat...**M3W**. Fun...**M4M**. K3 100W, SO1R, 5 meter wire with ATU (LDG), Win-Test I found some time on Sunday afternoon, set up antenna, then on and off. Eventually Windows update started, takes more than 2 hours. Well, at the end of the day, this is not a serious effort. Thanks for QSO! See you in next event. 73 Kazu...**M5Z**. First ever CW multi-multi entry from M6T, this was in memory of our friend Bob, G4BAH who put the station together. Everything worked well and we had a very experienced team of operators but conditions were just as bad as in the SSB contest! So we are pretty pleased to post a score of 14 million...**M6T**. FT-1000MP, 100W, HF9-V Butternut. Conditions challenging to say the least. Who turned off the RBN? Here's hoping the 2017 contest will be better!...**M6W**. Used contest to try out inverted L on 160M at new QTH. Conditions seemed poor but improved on Sunday...**M7V**. TS590S, 1/4wl vertical, 400W, N1MM+, Gridsquare IO81wt Many thanks to Iain - G9V for hosting me at their site. 73...**M8A**. Some nice DX on my 40m long wire. Limited time owing to IT problems...**M8C**. Enjoyable trip to Scarlett Point on the Isle Of Man for CQWW CW 40m LP entry. This was a low key entry with only a single vertical for antenna. Conditions to US/VE were exceptionally poor from the start with

only 7 US stations worked by 7 am on Sat morning and not one VE. No zone 3 worked all contest and none even heard at any workable strength. 88% of QSOs were with EU so that tells that there weren't too many 3 pointers. However CQWW CW is addictive and you always wonder what you will do different or better next year. I finished at 19 evening out of necessity...**MD2N**. My first ever CW contest. Phew!...**MM1E**. 1st CQWW CW. Great fun! New radio & ant next year to improve on benchmark...**MW0BRO**. Poor cndx first night, good EU opening second night. Running K3S to K8RF 1/2 wave 160M Loop Thanks to everyone for the QSOs! 73 Dan...**NP2J**. First Licensed APR 08, 2014...**OE1VMC**. Tx Power 8W...**OE1XTU**. Checklog...**OE2LCM**. WT keying issues forced DX picking with old XP standby system. Nevertheless GREAT FUN AGAIN - tnx 73s es bncu Gerd...**OE3GSA**. Condx better than in SSB leg. 10m was nearly dead, but low bands at times wide open. Eventually I fed the 160m dipole on 80m and worked some stations with QRP. Fun to see who has good ears and who not. Thanks for meeting on the air. And if not this time maybe next time...**OE5OHO**. Rig was Elecraft K3 + P3, G5RV, 2-EI Quad, N1MM+ Logger, nanoKeyer, CCUser, CWGet. QTH Graz, the station OE6XUG of clubs RCCW and OEVSV. Most of the Operators new in cw contesting, doing a practical contest training under supervision of OE6RDD, Gehard - founder of the famous cw schule Graz. Special thanks to all of our supporters, at first OE6OKG, Prof. Otto Koudelka, Head of Institut fuer Kommunikationsnetze und Satellitenkommunikation @ Graz University of Technology...**OE6U**. Station locator KP10XO...**OG2W**. Very poor conditions here in the north. Some nice surprises on the lower bands...**OG6N**. Just a few qsos 4fun with poor set up rx: K2/100 ant: inv-L with no rx ant :-/ abt 4 hours on air. Tnx for qsos, maybe next year with better effort hi 73...**OG6T**. Many thanks for the contest! Merry XMAS and Happy New Year!...**OG9R**. I have been a devoted fan of CQWW CW for 57 years ever since 1959. This year the space weather was not favourable here in the north. Neither was the atmospheric weather good for outdoor life with 21 m/s wind gusts and snow showers. I took short and long breaks every now and then to find motivation. After a full hour with only 6 QSOs it was time to switch off. Now after a good sleep back home I feel great again. Wishing for the best in the future. But in fear of even worse for the coming years. After all it was a great fun with a different flavor. Congrats for the lucky one whos signal path to NA and Japan did not go that far north. Many thanks for the QSOs and see you in contests again. Pertti...**OH0R**. Great collaboration with OH0Z, my next door neighbor. OH6EI Tomi was there this time. No QRM whatsoever. During CQWW SSB there was minimal QRM from operators OH9MM and SM5SIC. But furing SAC SSM OH1JT was there causing me to having to stop operating. OH1JT was blocking whole band where he was on. Root cause was neighbor-hostile amplifier tuning as OH1JT has the knack for sure. He knew what he was doing. Most unfriendly. Good luck with the logs. Hear you all again in 2017...**OH0V**. 73 de OH1SIC/SM5SIC Gran OH1S. Thanks to oh1tx for the use of station, hot-tub, sauna and the fridge...**OH1TX**. Challenged conditions, every qso was a victory!...**OH2BEN**. Some QSOs just for fun...**OH2BH**. Really bad band propagation on 40m. During the contest I did not hear a single US station...**OH2BMH**. The Aurora once again spoiled K/JA openings...**OH2KW**. Remote Station experiment. 6 x sauna + small beer party during contest...**OH2LZC**. Conditions quite good here in the north...**OH3WD**. Our contest team member Ari OH1EH/OH5DX became SK last summer. We decided to operate CQWW CW contest with his vanity call OH5DX as a memorial event for Ari. Our core crew is now missing one member. Ari's relatives helped us to get his call for our use even though it normally is two years in quarantine. Everything else went well

except propagation. High bands were especially challenging on Sunday. Only one JA on 15m and very few US stations. Only about 400 qsos on 20m on Sunday etc. At least low bands were decent and interesting. Missed XE for sweep on 40m. It was nice to see Jukka OH2MA (ex-OH1XM) with us. Jukka was one of the OH1AF contest gang members in the 1980s. Also OH1XT was very kind to arrive to help us — even after the nightshift at work finishing at 7am on Sunday...**OH5DX**. Checklog...**OH6NC**. FT-990, OCF-Dipole 80-10m @12m. Tough propagation this year!...**OH8KA**. CHECKLOG...**OH8SE**. 50W AND GP ANTENNAS...**OK1BA**. TRCV IC-718 MAX 100W, ANT GP...**OK1BLU**. Worked 19 hours in SOSB 160 casual style with quite a few breaks. Came close to the quantitative goal of 1000 Qs, but short on quality i.e. Zones and Countries. Unfortunately Topband was weak in both East and West DX this weekend, only a little JA and Zone 5 in Sunday evening. Had a bad DSL connection to the station creating lots of packet QRM and most likely also messed up CW keying a few times as I got quite a few dupes. We also got heavy wind and snow on Saturday, but the antennas survived the weekend. WX created a little QRN on Sunday evening with increased noise levels, but only for a short while. Despite the weak result, a fun weekend in the QRM. Thanks for the points, 73!...**SEØX**. POOR CONDS...**SMØFPR**. LICENSE DATE JULY 2 2013 i'm a blind Ham and haven't got a logging program so hope this is ok i'm not sure what my claimed score is, i didn't find the bands open to EU very much, maybe next year? i think i have one dupe with NR4M oops...**VE5SDH**. I had a lot of fun operating this contest on a blustery November weekend with 3 radios my FT-897D a vintage FT-757GX and the Venerable old IC-751A. 73 Gerry...**VE7BGP**. Wow, what a wild ride. I haven't been able to do much serious contesting for the last couple of years as my wife has serious health problems. Didn't have time to mount a competitive effort so decided to try out a couple of things. I've always wanted to record my contests but never got around to it. The recent NCJ article by K6XX showed me the way. So, I bought the recommended voice recorder and tried it out. He was right about the instructions being rather obtuse but I finally figured it out. The other thing I tried was SO2V as my K3 has two receivers and N1MM+ does a good job of supporting it. After some fumbling around I started to get the hang of it without too many blunders (such as calling CQ right on top of, I think, W7WJ after I'd just worked him in S&P mode). Seems I did 434 Qs on the Run receiver and 78 on the Mult. Boy, I gotta do this some more. One thing which took me totally by surprise was that I was generating pileups deeper than I've ever done before. Rather like the expeditions experience with a continuous wall of sound while trying to pick out call fragments so I could make Qs. I guess that with Eu missing lowly VE7s suddenly appeared much more attractive. I had rates and runs way, way, way beyond anything I've done before in 20 years of contesting. Best 10 min rate - 168 Best 30 min rate - 138 Best 60 min rate - 133 Best run - 280 Qs in 2-1/4 hrs Not bad for an ancient op on a 33 ft x 120 ft city lot 73, Jim...**VE7FO**. Condx were up and down and generally poor. Not our usual score...**VE7GL**. Can't do much about propagation. Fun anyway...**VE7VR**. Was great to see 15 open, 10 was a wasteland...**VE8NSD**. This is my first time submitting a log in the "Classic" category. I didn't plan this, it was thrust upon me. At 2330 on day 1 of the contest, my amplifier broke down. The rotten conditions and these equipment problems together broke my spirit...**VE9CB**. Hustler 6BTV and 500W...**VE9HF**. Actual TX Power: 100W OLD, OLD TIMER OPERATING FROM RETIREMENT VILLAGE WITH MAG LOOP ANTENNAS ON BALCONY...**VK2EL**. Excellent band conditions at a low noise rural QTH, with a great band openings for 15m and 10m Radio TS590S Antennas A 2 element triband beam at 6m, a 4Square for 40m, an 80m dipole, and for 160m an inverted L...**VK2GR**. Tcvr Antennas Very enjoyable contest, alternately CQing and searching & pouncing in "antique" operating mode - i.e. without a spot-

ting list! I should have read the rules more closely, and dropped the Tx output power to 100W so I could enter the Low Power category 73, & Tnx for managing the contest!...**VK2IG**. Twenty metres absolutely dead here-worst I have ever experienced. On the other hand, 15m was very good. As always, great fun, even with a multi-band vertical and just 100W...**VK3FM**. Very surprised EU was hearing my QRP 5W on 40m during the contest...**VK3GK**. Great low band conditions, especially 40 and 80. I was very lucky my QRN was very low, as today, one day after the contest, it is terrible. I look forward for the next 4 or 5 years, when I expect the low bands to be even better. Thank all, for the contacts...**VK3IO**. Another enjoyable weekend of radio contesting! Running low power on 40M from a noisy quarter acre urban block in Melbourne city proved to be a good challenge. It was difficult to break the pileups or hold a run frequency for any length of time with low power. I ended up spending the majority of the time search and pouncing. Conditions seemed OK but not brilliant. Fortunately there was minimal noise from lightning which can often make copy on the low bands difficult at this time of year. Radio - Flex-6300 80W Antenna - Inverted vee dipole with the centre about 20m AGL over our 2 story house. I also have a 16m tall vertical antenna with elevated radials but this was not used as I found signals were generally stronger, along with less man-made noise, on the dipole...**VK3MI**. Lack of propagation in 10m...**YW4D**. KENWOOD TS430 S, SPIDER BEAM & 3-el. 3 bands...**Z31TU**. Made combination of home and QRP portable operaing...**Z35M**. Pretty challenging conditions both days, but who says 80m DXing is easy? It might be easier though, if some of the stations with beams would occasionally listen for "down under." Likewise, some of the QRQ types might benefit from listening for longer than a micro-second between their CQ's. Do they ever actually work anyone? Never mind - great fun and my thanks to all those who worked me. CU all next year!...**ZL2AGY**. Checklog...**ZL2AIM**. My first attempt at a cw contest. Only did a few minutes...**ZL2CC**. CONDITIONS POOR, STORMY WEATHER SUNDAY AND SUNDAY EVENING. VERY POOR CONDITIONS MONDAY...**ZL2JU**. I enjoyed the contest...**ZL7/W1XGI**. Very nice Contest, but had no propagation on 10 at all! 73!...**ZS1OIN**. Bands conditions in ZS2 Very Poor with Heavy QSB...**ZS2DL**. Limited activity entry...**ZS2EZ**. Had a few personal commitments during the two days of the contest so decided on a single band entry using 40m only this year. Went ok and quite satisfied with the results. Managed a few new ones 736 barefoot with 100W and a 40m long end fed Zepp antenna at about 15 metres average height. Hope to back on all bands for next year. Thanks to all the organisers!...**ZS2NF**. Checklog...**ZS4TX**. ICOM IC7200, ANT. TH6DXX, DIPOLE 40 METERS...**ZW75FAB**.

## USA QRM

First time submitting a log...**AA2HJ**. Vertical worked better than beam on 15m!...**AA6EE**. THIS CASUAL CONTESTER HAD FUN AS USUAL - TNX & VY 73!...**AB1DQ**. THIS IS A COMPUTER-FREE STATION, JUST PEN, PENCIL AND MANUAL TYPEWRITER...**AB1UF**. Checklog. Tnx to organizers!...**AB1VL**. I just wasn't into it this year...**AB1XW**. My first CQWW contest was a great experience...**AB1YD**. 60-100W out, all wire antennas at 28-39 Ft...**AB5ZA**. Scoring estimate 4 countries (USA,Canada,Curacao,Dominica) COUNTRIES = 4, ZONES = 3, QSO = 44 SCORE= 528...**AC2HJ**. Sunspots where are you?...**AC2IK**. 10m not in good shape. Low bands not too good Saturday night, but seemed to be improved Sunday evening before contest ended. Thaks all QSOs. Casual contesteer...**AC4G**. Had a little time Friday evening before a Thanksgiving

trip...**AC9S**. Hardest 85 contacts I ever made in a contest...**ADØH**. When the sun gives you lemons, listen to Beyonce's "Lemonade"...**AD1C**. Five-day log deadline, ill conceived solution to cheaters, inconveniences all...**AD1L**. CQWW CW 2016...**AD4ES**. I operated QRP from Augustine Beach, Delaware with an IC-703...**AE3J**. FTDX5000D, AL-1200, Top loaded vertical, 2 beverages Worked the EME contest last weekend so did not spend quite as much time operating in the middle of the night in this contest. Conditions were much better to Europe on Saturday night than Friday. I still had trouble putting calls together as many were very weak. I appreciated the patience of those where copy was difficult...**AG4W**. Check wikipedia for "little pistol ham station," and you'll find me...**A14IC**. KØDQ @ K8PO. RIP Paul...**KØDQ**. Jumped on for a few QSOs amongst many holiday celebrations. Incredible contest as always. Was really nice to hear and work much more EU and JA vs WW SSB a month ago. Also enjoyed the 80m action on Sunday morning before local sunrise. Thanks for the great fun, see you next year and 73!...**KØGEO**. Rigs Force 12 stacks and N6BT modified yagis Minnesota Wireless Assn...**KØMD**. Checklog...**KØYCR**. Licensed 11-14-2014...**K1DBM**. SkookumLogger K3 2000A 2XA-3B-12L OB2-40 wires...**K1GQ**. High noise and really weak signals made 80m conditions pretty difficult. Glass Half Full view — great conditions for improving weak-signal copy skills!...**K1NYK**. Rebuilt the interior of my shack. New SO2R wood hutches, and very complex switching. So complex that it really didn't work. Though I had two radios and two amplifiers, I never really did SO2R. Wait until next year!...**K1VR**. Band condx improved a bit on Sunday...**K2AL**. Date of first license 07-Jul-2015...**K2MV**. 89 COUNTRIES, 20Z, 199 Q WORKED WITH WIRE VT AND SAL-30 RX ANT EUROPE HEARD 3 HOURS BEFORE BEING HEARD SOMEWHAT POOR CONDITIONS...**K2RR**. Attic antenna farm. RX verticals helped a lot...**K2TER**. K3CCR is the club station at the Collington continuing-care retirement community at FM 180W in MD, just east of DC. Only I (N3UM) was available for CQWW CW. In SS CW we made little use of skimmer spots: Discovered late that Telnet setup had changed from N1MM Classic. I sorted it out before CQWW CW and went SOHP Assisted, using skimmer spots heavily when run rate dropped. I tried to run on 40m at 00Z start. BIG mistake: 2 no-point W/K QSOs in 6 min. of CQs. OK, maybe a bad run freq? Another run freq. got 9 Qs in 10 min., 5 W/K, 2 VE, & 2 EU! Much better results on 40 doing click & pounce on skimmer spots: 121 Qs in 3.2 hr. Steady and slow at 38/hr, but nearly all were 3-point EUs or NA mults. 160 and then 80 m. were slow and weak: 8 Qs on 160 in 20 min, 35 Qs on 80 in 1.2 hr. QRT to sleep 0535Z. Next morning from 1213-1320Z I ran EUs on 20m: 92 Qs at 82/hr, then 30 more in 30 min. Clicking spots. Next a nice surprise: 15m was much better than VOACAP forecast. Got 103 Qs 14-16Z: Most 3 points, some NA mults. Even ran EUs briefly (20 Qs). Meals, nap, shower, and mult hunt 16-0030Z. Saturday: Only 78 Qs but 50 mults on 20 and 15m. From 0040 to QRT at 0515Z, got only 70 Qs on 40m, and a pitiful 36 Qs total on 80 and 160m Sunday morning was slower than Saturday: 90 total Qs on 20m, but 111 on 15 m. and 15 on 10m till lunch. Sun PM slow, hunting mults: Found 8 zones and 23 countries, incl. ZL and JA. Rare mults: 3B9 Rodriguez Is., FO Austral Is., ZD8 Ascension Is., KHØ Marianas, and DP1POL, South Pole, one call on 20m. My goal was 1K Qs and 1M points, but fell short due to poor low bands and having to use our backup C3 tribander, 60 ft. up instead of our primary Skyhawk 70 ft higher. This cut EU run totals on 20m...**K3CCR**. Just a wire and 100W...**K3NDM**. Brutal condx, but fun even so...**K3SW**. Many thanks to Jim, K4QPL for the use of his fine station. Part time S&P effort K3s, P3, KPA500 N1MM+ Inverted Vs for 40, SteppiR and TH7DXX for 20/15/10 73, Tad...**K3TD**. Very poor band con-

ditions on 80m made operating QRP a huge challenge...**K3TW**. Friday night forced myself to shut down at 3 am. Great 20m run on Sunday...**K3WJV**. See website diary at k3wvp.com for details...**K3WVP**. Another deluxe weekend...**K3YEO**. Learning to use new rig...**K4EOR**. I apologize for my having to go through this conversion process...**K4FDP**. New countries on 80, excellent conditions on 20...**K4KAY**. No propagation over the poles...**K4RDU**. I was going to go all band for this contest but when I listened to 10, 15, and 20 at 2330z on Friday, I decided to go single-band 40m. That was a good decision, 40m was awesome. I easily heard more than 100 DXCCs — of course, at this retirement QTH with low power and a stealth wire vertical, I can no longer say “if I can hear ‘em, I can work ‘em.” But I did have quite a few good ones. Best DX — JT5DX first call. I heard a lot of DXCCs I couldn’t work because they were using S&P instead of running. I can’t blame them, because I used to do the same thing when I was A92ZE because of the grotesque pileups that a CQ would generate...**K4SXT**. Here for the fun!...**K4VD**. Rookie...**K5EDI**. Checklog...**K5FNQ**. House full of family, an hour here and an hour there...**K5HP**. K5LXP/M US287 & I-40 in TX & NM...**K5LXP**. First contest with new antennas. Shakedown cruise!...**K5TU**. Mostly worked 80 for 5BDXCC additions...**K5WL**. It was like an SWL competition. All I could do was listen to Europeans work each other...**K5ZD**. First CQWW CW contest submittal...**K6BY**. Didn’t get to work too many hours of the contest but had a lot of fun with my old station (Heathkit DX-60 and Drake 2-B). A very big thank you to all the stations that did copy my 40W signal to an inverted v. Hope to do better next time...**K6CTW**. This was mostly a “click-n-pounce” contest and I managed to get an all-time new one for DXCC, much thanks to XX9TXN in with a great signal a well-managed pile-up, and a terrific operator. Decent conditions with the A index being 10, K=3, and SFI=83, but noisy and no shortage of deep QSB. I ran 300W into a Cushcraft A3S tribander up 13 meters and my HF9V with 83 radials. N1MM ran beautifully throughout (tnx N1MM!). I regret I didn’t have my 160m antenna back up for this contest as I could hear a number of stations with my HF9V even some DX. Thanks to everyone for the QSOs! 73! PS - I am taking suggestions for a good antenna for 80m that would fit in a 0.2 acre suburban lot. PPS - also taking suggestions for good receive antennas for the low bands...**K6JEB**. CHECKLOG...**K6RF**. ALL MY CONTACTS WERE S&P. BAND CONDITIONS SEEMED POOR THIS YEAR. ONE OF THE THRILLS OF THE CONTEST FOR ME IS FIRST HEARING EU STATIONS COMING IN ON 20M AT MY SUNRISE WITH FLUTTER ON THEIR SIGNALS. THIS YEAR THERE WERE NO EARLY STRONG EU STATIONS HEARD. I USUALLY WORK MANY EU STATIONS BETWEEN SUNRISE AND NOON BUT THIS YEAR ONLY A FEW STRONG ONES GOT THRU TO ME. I DID NOT HEAR THE USUAL STRONG TM, DM, IT, HG, ETC STATIONS THIS YEAR. ALSO THE SAME FOR AS AND OC DURING MY AFTERNOON. JUST DID NOT HEAR MANY COMING THRU. MANY STA THAT I DID HEAR COULD NOT HEAR ME ANSWER THEM. AND ALMOST NO ACTIVITY HEARD ON 10M. I REMEMBER MANY YEARS AGO 10M WOULD BE PACKED WITH SIGNALS. THIS YEAR ONLY A FEW SA STATIONS WERE HEARD. OH WELL, THERE IS ALWAYS NEXT YEAR AS THE CUBS PROVED. 73 CUL NEXT YEAR...**K7ACZ**. First CW contest—thank you to the CW Academy, especially Will, WJ9B...**K7AJM**. Worst 80m band conditions I have ever seen. Couldn’t hear much of anything except the Carribean...**K7DD**. CHECKLOG...**K7HV**. Another fun weekend using the remote station!...**K7JR**. Just looking for band countries on 80 and 160. Poor conditions...**K7PI**. My first CQWW in almost 40 years after returning to MT to “retire.” A superb way to test out the new station and antennas. Boy do I have lots of work to do...**K7QA**.

Conditions on average were just OK. It seemed we just missed the Solar Storms that have been abundant as of late. I am fairly pleased with the performance of the station. It seemed all the antennas played fairly well as I felt LOUD regardless of band. The 3-el 20m Monobander at 43’ remains the most competitive of the bunch. Used an elderly IC-746 driving a AL-80B to 700W. Mostly Hunt and Pounce with a couple of runs on 40 & 80m into Asia at my sunrise. Many thanks to all who activated rare DX over the weekend! You made it fun. Only EU contacts in the log were a pair of OH8’s on 20 late Sunday afternoon. Only Qs on 10m were a pair of KH6’s also on Sunday. Kept my butt in the chair Friday till 2 AM, then intermittently the rest of the event as I didn’t have the energy for a full bore effort. See you all next weekend for the ARRL 160m Contest. Hopefully I will have up a pair of new Beverages by then...**K7XC**. Had fun! Plenty of DX to work (except EU)...**K7ZD**. Conditions were tough! Using only verticals on all the bands was comparable to wearing white socks and brown shoes to a formal dinner. It did not fit the intense competition of the CQWW. Next year better!...**K8GL**. Checklog...**K8ND**. Need more, bigger antennas!...**K8ROX**. Worst score in over 10 years of submitting, lived with s7 noise on 40...**K9CJ**. Antenna is rain gutter and downspouts...**K9GDF**. Tough conditions when K is 4 or 3. YIKES!...**K9GY**. Good conditions on 10m. Was limited to 3 hrs...**K9HXO**. Friday night and Saturday bands were poor. Sunday things improved but all in all a disappointing weekend...**K9IJ**. Most of my couple hours on 80 and 40. Enjoy lower bands in winter months...**K9JWV**. Low SSN, but at least Kp was high!...**K9MA**. Very limited effort...**K9NR**. I really hope condx are on the rise...**K9PG**. I had planned on doing 80m Single Op Low Power, however Mr. Murphy made a visit. With very high VSWR reading on 80 (only 2 Qs) and resulting very low power of 25W, I changed my mind and decided to do SO 40 LP. The rest of the Murphy Family showed up. Again very high VSWR readings and low power! Luckily I have another 40m antenna, so used that one, but it is not as good as the original 40m. I almost quit several times as disappointment and frustration continued. But I pushed on with very challenging band conditions and my less than stellar enthusiasm now for this contest (which is one I look forward to every year!), I did the best I could. A “HEX” on Murphy and his ilk! Hoping for a better time next year. By the way, I still have yet to solve my issues with both 40 and 80. Everything was FB prior to the contest. Thanks for the Qs and having to struggle to copy my less than normal signals on 40. 73, Vic...**K9UIY**. Had fun, but family duties limited time at the station...**KAØREN**. Always fun chasing DX and zones! Thanks for an awesome weekend, 73...**KA3DRR**. Thank you to everyone who participated!...**KA3MTT**. Very weird conditions but CQWW CW is always a great time!...**KC1XX**. 7.75 HRS. VIRTUALLY ALL S&P...**KC4D**. There was plenty of good DX to work this weekend...**KC4G**. Thanks to all of the great operators worldwide!...**KC4TEO**. 2017 is not our year, Mets fans...**KD2IWM**. Good contest, 20 & 40m were hot...**KD3RF**. Interesting propagation. China could not hear NA...**KD6WKY**. First time entering the event...**KD8DEU**. Licensed 4/11/2015...**KEØEBK**. CHECKLOG. I gave wrong Zone to first few stations. 7 instead of 4...**KEØTT**. Rig: K3/P3, Expert 1.3K-FA score from last year (almost doubled it! due to more BIC time), and work on 80m DXCC (results TBD - hopefully a few new ones in there)...**KE4S**. Sad to see conditions going down so fast. Long years before prop returns...**KF2O**. Intended to only dabble for the first hour. But 15m was too interesting. Used SD for logging...**KF7E**. Why do family events have to be scheduled over CQWW weekend? Just some remote control DXing from the hotel room...**KG4V**. licensed in 2015...**KG5HVO**. I think LP is the new QRP!...**KG9Z**. Thanks for the fun time! 73, Steve...**KI4EZL**. 100W and a wire antenna up in a tree. Part time!...**KI6OY**. Propagation very poor

and I operate from an apartment...**KJ1J**. Just foolin around, Friday night condx were so bad I went to bed early...**KJ9C**. First time operating CQWW. Just 3W with a wire in a tree. Great!...**KK9JEF**. FT817 not ND at 4W into End Fed Zep up 10 feet...**KL7R/W6**. Just dipping my toe in the water of CW contesting—pretty intimidating!...**KM7N**. FIRST LICENSED 05/28/2014...**KN1FE**. 15m QRP 5W to end-fed wire...**KN1H**. Thought I would see what I could do with 10m...**KN4Y**. “Classic” is a stressful category to operate. 1 radio, 24 hours and NO assistance in any form. You are always wondering “Am I on the right band and doing the right thing, THIS MINUTE? Therein lies the challenge, especially with tricky propagation. I was ill during the contest and lost a radio. But I had working antennas for all bands! CQWW: Lots of mults and always an experience! Thanks for the Qs and mults! 73 Bob...**KQ2M**. As usual 20 was the best band here. 10 was totally dead and the others were real flat but found enough activity to keep the multipliers coming but the usual places for QSOS EU and JA had weak to nil sigs from the not so big gun stns. Interesting what can be worked with low SFI, though...**KS7T**. Thanks to the organizers...**KT8K**. Better condx than SSB!...**KU2M**. FT-897 / Vertical Dipole for 20m / N1MM+ / MRP40 73...**KV4QS**. 18’ end-fed up 12’...**KW3F**. CDX on 80 not good - 40 much better. Got sick and cut CT short...**KX4TT**. Just trying to work a few new ones on 80m (which I did!) Thanks for the fun!...**KX7L**. CHARACTER-BUILDING CONDITIONS - A GOOD CONTEST TO TURN INTO A DXER!...**N0AX**. Society of Midwest Contesters...**N0FCD**. Why do family events have to be scheduled over CQWW weekend? Some remote-control DXing from the hotel room...**N1EN**. 12TH CQ WORLD WIDE DX CW CONTEST...**N1NN**. Torture...**N2BJ**. NOT COMPETING GREAT CONTEST WAS A LOT OF FUN...**N2BZD**. LOOKING FORWARD TO NEW ANTENNAS...**N2MA**. Interesting conditions...**N2SR**. Fun operating remote (1st time) from FL...**N2WK**. Part-time effort. Had fun running on 80/40/20/15 at various times. Goal was to improve logging accuracy and cut down on dyslexic errors. 100% loss of vision in my right eye seems to have helped that! Hope to travel again next year. Family at home is good, too. Antenna arrays / stacks played rather well some work needed on 80SE. Log is unchanged / raw except I “zeroed out” 3 QSOs with alt-n notes...**N3IQ**. Rough condx until Sunday afternoon. JAs came in loud...**N3OUC**. Many Stn problems to keep me hoppin this yr. Still great fun!...**N3RS**. Tough going with a short vertical!...**N3RW**. Was fun! Jose...**N4BAA**. Always a learning to do better. I had fun and that is most important...**N4CU**. Chores kept getting in the way. Always a fun contest...**N4HAI**. Enjoyed a brief effort. Always great fun!...**N4NTO**. Felt like a SWL at times - heard way more than I could work...**N4TZ**. EU Qs down 85%, JA Qs up 115% on SOSB 20m in WWA...**N5CR**. Part time. Sunday was great!...**N5KF**. Terrible conditions band noise especially low bands here...**N6AR**. Much different operating from NW Arizona. Always wanted to make a rotatable 2x2 vertical array that we developed with Team Vertical. Seemed to work well over desert and no ocean! Now to see about one for 40?...**N6BT**. QRP, 5W to a 20’ piece of wire thrown into a tree out of my window. Operating time was limited, and conditions were not great, but I still had fun, although it was a bit tough at times to keep the enthusiasm up with current band conditions. Thanks to all for the QSOs. GO ARIZONA OUTLAWS! 73, John...**N6HI**. Europe from west coast was poor...**N6IC**. OPERATING FROM TENNESSEE PAY ATTENTION TO WHERE I OPERATED FROM! DON’T INCLUDE ME WITH W6’s...**N6MA**. 100W and a wire Unusually quiet bands!...**N6PUC**. I should have gone to 40 at the end. It was full of Europeans well before sunset! Amazed that 10m was so weak! Amazed that 40m was the most productive band...**N6RV**. Great time had from Radio Oakley...**N6WM**. This was a “Multi-Single Classic” operation, a category

that does not exist but should. Two operators took turns at the controls of the station which was set up for SO2R operation. There was no separate multiplier station. There was never a moment when both operators were listening to different frequencies. But to increase the fun of operating, we did take advantage of the SO2R configuration and make contacts on different bands, ignoring the 10-minute rule that handicaps True M/S entries in a misguided attempt to prevent The Dreaded Octopus. We had no octopus. It would probably qualify as a Multi-Two entry if we labeled all Qs on 160, 40, and 15 as Run 1 and all Qs on 80, 20, and 10 as Run 2. But our logging program will not generate Run1=0 and Run2=1 fields unless we actually have two networked computers, which we did not have. We had one computer, one operator in the chair at any time, and, in the spirit of the more sensible M/S rule of the California QSO Party, each operator stayed in the chair as the sole operator of the station for at least 10 minutes before the other operator would sit down. In fact, most operating sessions were hours long while the other operator got some rest or attended to Life Outside of Radio. So we thoroughly enjoyed operating Single-Op-At-A-Time-Two Radio, a category that you will probably consider to be Multi-Multi. Have it your way...**N6XI**. Had software issues between Flex6k & N1MM+ coupled with OP error...**N6XT**. Very poor conditions! No JA on 160, no EU on 40, no eastern EU on 20! 4QSO on 10m. What a difference a year makes on solar cycle decline...**N7EPD**. Propagation gods were not smiling down...**N7RCS**. 9 1/2 hours of testing my small, new low power setup. Had a lot of fun and was positively surprised by the performance of my SteppiR vertical on 40m...**N7RH**. E-MAIL SORRY, MY COMPUTER LOGGING PROGRAM WAS HAVING PROBLEMS. I HOPE THIS CONVERSION WORKS FROM A REGULAR LOGGING PROGRAM...**N7VPN**. Short breaks with BIC 14h 21m contest time 18h Quit early due to approaching lightning ZM4T was long path on 15m, HSØZAR and 9M8K short path on 40m...**N7WY**. Fun on 40m Sun. The JA runs at night took some of the pain away...**N7ZG**. 5 HOURS. WITH MY ARM IN A SLING DUE TO SURGERY. YES, MY KEYING ARM!...**N8DE**. Tough except for 20m, disturbed condx until Sunday AM, low SFI...**N8II**. I am very thankful for my 50Hz CW filter!...**N8LR**. Still the best contest and a great way to fill DX Marathon slots...**N8MZ**. Licensed 7/25/2014...**N9KIT**. Checklog...**N9RC**. Not a good weekend to be north...**N9RV**. Daytime hours both dyas filled with holiday activities so decided to do just SB 80m. Conditions were terrible for my low power, low antenna handicapped station. The best conditions appeared to be sunset time frame two hours before the end of the contest! More than doubled my score in the last hour and a half of the contest! Thank goodness for all the VE stations! Station conditions, K3S/P3 100W, 40/80 short dipole at 35’, N1MM+ logger...**N9TF**. Rig: Flex 6500 and SPE Expert 1.3K-FA Antennas: Cushcraft X9/X940 and OCFD FUN!...**NC6B**. 15m was the main band for my indoor dipoles this year!...**NC6Q**. I didn’t hear one EU station...**NC6V**. A very part-time effort — the propagation didn’t motivate any more time...**NDØC**. Conditions on 80 & 160m — I could hear them, they could not hear me!...**NIØG**. Operated a few hours during evenings S&P. Was fun though...**NJØF**. Could only work part of the contest. Band conditions seemed pretty good...**NM1Y**. Just playing around; I wish CQWW CW wasn’t usually on the Thanksgiving weekend...**NN4X**. Very part time operation. Friday night I worked a few Zone 3. Before sunrise I could copy a few Alaska, Hawaii, and Japan but not get their attention while QRP. Second night I heard plenty of stations I couldn’t work. Finally got an Alaska. Second sunrise had few stations, none who could hear me. NN7SS (op K6UFO) 160m Kenwood TS-590s at 5W Writelog and microham micro2r keyer Panadapter by SDR-IQ receiver and Spectravue software...**NN7SS**. Thanks to all who

---

help make this great contest possible. Pete...**NO2D**. My first contest from the Pacific North West. Last contact: KH6L (2,600+ miles) - KX2 @10W into an MFJ-1820T w/ 13' radial sitting in my living rooming Equipment: KX3, PX3, KXPA-100, last hour KX2 @10W Antenna: End-Fed vertical on an 31' fiberglass pole on my deck...**NT4H**. Family-first, holiday style operating, my personal best CQWW CW...**NZ3O**. Checklog...**W0TK**. This program gave me 0 credit for to1a? wish we had a better opening to europe 73 john...**W0YJT**. One antenna for all bands: Wire, 70-ft long and 30-ft high...**W1HIS**. Always an enjoyable time on the radio. Thanks for the contacts...**W1QK**. Didn't start until Saturday morning. Was late going to 40m. All S&P...**W1YM**. Inverted Vees for all bands. 80/160, 40/15, 20, 10 Yankee Clipper Contest Club...**W1ZZ**. I Miss my tower! Had only short amount of time for this contest. It was difficult making Qs with only a low wire. Still had fun...**W2GB**. IC-7000 barefoot Hex Beam for 20 and up R7 vertical for 40m. 40m dipole used on 80m and I thank the N1MM+ crew for a marvelous contesting tool! (never touched a telegraph key in the whole contest :)...**W2JC**. Conditions dead too quick...**W2TZ**. CHECK LOG...**W3UL**. Less than Classic: Single operator, one radio, no packet, hidden antennas from our Florida winter QTH. Still it's always good to pass out some QSOs to the deserving...**W3USA**. First try at a contest after 48 years off the air. Submitting small log to make sure those contacted get credit...**W3WTD**. Only took part part time as I was on holiday Good to hear some favourite calls in the test A lot different from being at home in the UK Nice to be able to use SD for logging...**W4/G3LIK**. ICOM 7300...**W4GHV**. Thank you! 73 John...**W4HVV**. Checklog...**W4JDS**. Thanks for the Qs. Vic...**W4VIC**. Rig: K3 and ACOM1000. Antenna: 6BTV- 64 radials. Conditions not very good, heard many worked few...**W6NS**. I can't think of a better end to a Thanksgiving weekend than this contest!...**W6QU**. Conditions very poor, quit after 2 hours...**W6SR**. RX: sx71/bc453 with a beverage down the hill tx ARC5 VFO DX20 driver three 810s in parallel 500W antenna off ground (8') quarter wave vertical 5 radials...**W7DRA**. First CW contest. Much fun and will be back again...**W7IWW**. Didn't operate much. Rough conditions here not many heard first 1.5 days. 40m finally opened up to EU around sunset locally so got some EUs finally. Otherwise, mostly Caribbean stations...**W8JPF**. All Search and

Pounce...**W8KNO**. Checklog...**W8NNX**. Marginal conditions. Struggled...**W8WA**. Even though conditions were marginal at best this was still a blast and the amount of activity was super. I can't imagine not operating this event...**W9RE**. GREAT WAY TO SPEND A HALF-DOZEN HOURS. MNY TNXS OMs...**W9YA**. Good to work the world even if propagation doesn't cooperate...**W9YK**. Lots of FUN! 73...**WA1NBS**. Drake c line, dx-88, kt-34, (brg 270 deg) vibroplex bug. worked wac. 111 QSOs...**WA2ALY**. My first big CW contest. It was a blast!...**WA2FZB**. First time submitting a log. Never had anyone ask for me to submit a log...**WA3GM**. Checklog...**WA4EMU**. Lots of fun...**WA4HXC**. 10m dropped out early and my participation was low. Maybe next year!...**WA5ZKO**. Pretty cool working 3 VE9's in 10 minutes. Not many openings to Europe...**WA6KHK**. Operated remote from Tokyo, Japan...**WA6URY**. A challenge to find hole in pileups to place a 5W signal at 30 wpm and get heard. Fun!...**WB2PEF**. Part-time sneak in contesting over the T-Day Holiday...**WB4OMM**. Flex6300, Hamsticks, CW-Skimmer...**WB7QMR**. Band Condx not so great this year...**WB8AKW**. Operation during family Thanksgiving holiday on Galveston Island (EL29me). Granddaughters first contesting experience. They learned geographic locations as contacts were made and helped with logging...**WB8FVB**. Elecraft KX3 and dipole...**WD5DAX**. Could only operate for a few hours but the small indoor 48" telescopic whip antenna and 3W did ok...**WD6DX**. Conditions not so good here, but always a (mostly) fun time! Last year I said JA3YBK was our only JA on 10m. This year, JA3YBK was my only JA on 15m. Yeah, conditions not so good. About 95% S&P. Thanks for the QSOs! <http://www.we9v.com>...**WE9V**. Thank you Canada! Without you, I wouldn't have made it to 100 points...**WF0T**. TS 590SG, Acom 2000A, dipole at 55 ft. Brand new legal limit amp: Couldn't run more than a kw without crashing the computer...**WF3T**. IC-7410 and a dipole...**WH6YH**. Checklog...**WM9F**. There were too many alligators—all mouth and no ears!...**WN8P**. Poorer conditions than last year. About four hours of operation...**WO9S**. This is a WQ6X remote operation OF the NX6T station from a hotel in the SF bay area. You can read more about this event at the WQ6X Contest BLOG: <http://wq6x.blogspot.com/2016/11/wq6x-dabbles-in-cq-ww-cw-contest.html>...**WQ6X**. Too much football competition!...**WR2G**.
