

Great Contest - Tnx for all the contacts - 73, Don....**AA6W**. ALWAYS A FUN CONTEST....**AA7IH**. Many thanks to organizers and patient ops who QRS for me. 1st CQ-WPX es 3rd major contest. All QSOs @ LOTW. . Date of first licensing 3/13/2013....**AB1VL**. Rookie - 12/11/12 - Too nice of a weekend to be in the seat for 36 hours, but still had a great time. I know I made some logging errors. Oh well, try again next year....**AB3TM**. Europe was in VERY LATE on 15 meters, LZ9W at 0043z Sunday, 6:43 p.m. local time....**AD1C**. head cold made it hard ot copy CW. Lots of strong signals heard....**AF6T**. First Licensed December 18, 2012. Search and pounce during the first three and last nine hours. My CW listening improved quite a bit over the contest. Rig is a Yaesu FT-857D at 100W into a tri-band yagi at 8-10 meters and a 40/80 m crossed dipole up about 20 meters. I had a tough time until the last four hours, when propagation seemed to improve, the pile-ups seemed less thick, and most stations weren't so fast that I couldn't understand them. It was a lot of fun, though, and definitely a good use of my Sunday....**AG6RB**. About 4 hours of sporadic operating. Practice for WRTC....**K0DQ**. A little Slow in NH....**K1EEE**. The best part of the contest was a 15 m opening to Asia on Sunday in the late afternoon and early evening. After years of trying I worked three stations in China along with several JA's and Guam....**K1MC**. Severe local thunderstorm made me QRT after 26 minutes!....**K1ZZ**. 40M dipole....**K2PS**. Last minute decision to try LP category - FUN - almost forgot how well you can do with just 100 watts and a HexBeam....**K3IE**. "Band conditions on 28 MHz. were excellent for QRP."....**K3TW**. Logging program crashed mid-contest twice, but am submitting anyway with as much info as was recovered - possibly all although some numbers may be in error....**K3WWP**. First licensed 2012-09-12....**K5WL**. Great contest. Tnx to all who participated....**K6KQV**. I'd like to let all the 40+ wpm ops, even when condx are marginal, how impressed I am with their skills. The funniest thing was when I sent 59973 and I had to confirm the "73" 2 times....**K7CU**. Pretty good condx for late May....**K7HBN**. Nice to be back on with new tube in the amp and after a HD failure caused some time off. I have a better appreciation for the time it takes to install and configure all the software which makes my station run. For me, 10m was disappointing. 20m edged out 15m in production during the time I had. Again, thanks to all who answered my calls. 73, Jerry....**K7VIT**. First time as a QRP SOSB 40 meter entry. Tough sledding Friday and Saturday evening but it picked up the following mornings. Thanks to all for digging my peanut whistle out of the noise!....**K9JWV**. Conditions seemed to be better Sunday for my QTH. Was hoping to re-gain the W9 record for SO SB 40 LP category this year. Lots of good ops out there and it was good to see so many old friends and new ones, too! As usual, another fun contest!!....**K9UIY**. Put your comments here. Use multiple lines if needed....**KB1OIQ**. @ K7FA (AZ) via remote access....**KB7Q**. My first WPX-CW contest....**KJ1J**. K3, KPA500, planned on a few hundred QSOs... stopped at 1K. Eighty and ten were a bust here. Race weekend in Indy....**KJ9C**. First licensed - 9-7-2011....**KK4DZP**. At my age the rate on 10-meters is just about right....**KN4Y**. Conditions started poor, but improved over the weekend. Loud QRN from distant thunderstorms made the low bands quite a challenge....**KR7O**. OK 2 out of 3 ain't bad. When I realized that the JA prop near the end of the contest to make it to 1000 QSOS for the first time ever on CW in this contest just wasn't there I went for 500 pfxes and 1 meg pts for the first time ever and got it. Only took 57 yrs!....**KS7T**. Wow....**KS9K**. My first Contest....**KT4CB**. keep up the contests, which are great for the hobby/sport....**KT6L**. K3 / N1MM / 10-15-20 Hexbeam / 40m Delta Loop / 80m Delta Loop / 300ft Beverage. Licensed May 27, 2011. That was a blast. 40m and 80m cndx were poor Fri night. Many thanks to my wife for urging me to "break a million points" in the last two hours, and many thanks to all of you for the Qs. 73 KV4QS....**KV4QS**. This is one of my favorite contests but it's no fun when your head aches, you're coughing, and your eyes keep watering up. Pulled the plug after 18 hours and I'll look for the rest of you next year. Thanks for the Q's....**KV8Q**. For a somewhat casual effort, this yielded my best score in years. Things seemed a little slow at the start Friday afternoon, but picked up a bit after sunset. 15 and 20 were the money bands for me, 10 never seemed to have much other than the occasional South American station. But solid openings into Europe Sat and Sun made up for it. In fact it seemed like I heard (& worked) more Eu stations than US! Thanks for the Q's! Rig: KX3 & Hardrock-50 amp, Dipole up 70 ft....**KX7L**. An old 74 yo man; an old Drake TR-4; a wire antenna. How much better can it get? My first CQ WPX in many years. Won't be my last(God willing). Use multiple lines if needed....**N0KOE**. The VE8DX contact on 40m seems fishy to me. He was way too loud for that time of day. I suspect a pirate, but work forst worry later? I've X-QSO'd that line, but feel free to give me credit for the contact if there was some miracle of propagation at work....**N1EN**. 7TH CQ WORLD WIDE WPX CW CONTEST....**N1NN**. at K6ND....**N1RR**. No 20 meter antenna for this contest and only limited time due to family commitments. Most of my timem ws spent on 15 meters which yielded some nice catches while packet pouncing and searching - Liaos, China and a fewUN9 stations went into the log by Sunday mnorning Band noise plagued me until near the end....**N2FF**. Thaanks to all who worked me. 73's....**N3JNX**. Too many things going on this weekend. Glad to see you at Dayton!....**N4MM**. Enjoyed the brief time I got to play!....**N4NTO**. Had laptop problems- lost many hours!....**N4PSE**. 15m was my best band. Just a dipole up 15 feet. Forgot and left the FT2000D on 200 watts so I was high power. Fun casual operating....**N5PJ**. FIELD DAY STYLE OPERATION....**N6MI**. TU SN5X for being so patient with my weak signal....**NC6V**. Had alot of fun as always. Can't wait until next year....**ND3R**. SECOND TIME THAT CHARLIE, NF4A AND I ADDED A LITTLE CONFUSTION TO THE WPX...I USED HIS CALL AND HE USED NK4A. THE PROP NUMBERS DIDN'T LOOK GOOD AT THE START, BUT A CONTEST CAN ALWAYS OPEN TO BANDS...10M WAS ONLY DISAPPOINTMENT....**NF4A**. Thanks for Fox, NK4A for letting me use his call. Had some weird openings

in the middle of the night into EU and ASIA on 15 meters....**NK4A**. Not bad for QRP and an end fed-z at 15 feet!....**NK5G**. WOW! WHAT A BLAST....**NN3L**. Frequent thunderstorms interrupted progress. Cat on keyboard messed up contacts. Loss of CW copying skills messed up everything! Windows 7 clock kept switching time zones on me??? Hope all these things did not mess up any of my contact's scores. Frustrating, but still had fun. Pete, NO2D....**NO2D**. Great fun even from the confines of a mobile. Added a few new ones to my mobile DX including A65, 3V, and BY....**NO5W**. Not alot of time to work this contest but sure ws fun! 73s to all. de Mike (NO8C) Miller City, Ohio....**NO8C**. Fun contest....**NR7DX**. Great Contest Experience....**NS3L**. Very part time....**NU5DE**. Only had time at night but 20 meters was open each time I got on the air. Great openings to easter EU and asis on Saturday night. Amazing what 100 watts and a tribander will do. Had fun in between BBQs and parties this Memorial Day weekend. 73 de NW3H....**NW3H**. Checklog Entry....**WOODS**. Strictly S & P and Part Time. Saw a lot of familiar calls. Thanks for the contacts....**WORAA**. Condx fine but vy poor DX turnout. Sierra @ 5w 40m dipole up 36ft....**WORSP**. Busy weekend, thought I would just see what 10M could do. Rig was FTdx5000 (100w) and Butternut HF6V all-band vertical....**W1END**. Working 5W1SA in Samoa!....**W2DMZ**. Last year: 1.06M with 2 el OB4030 @ 22 meters. This year: 916K with dipole @ 13 meters. Not bad, I think! Glad to still have the hill-top QTH, at least for the moment. Friday night (local time), noise @ S7+, but signals from EU coming through. Saturday night, noise @ S6, but EU signals weaker. Sunday evening, S5 noise, but EU signals weaker still. Enjoyed the test. Thanks for the Q's! 73, Rich, W2EG....**W2EG**. Well, that was reasonably hard work, though I think I did pretty well. It's just my impression, but I think the second peak of the cycle is over. Yes, 15m was hot nearly all of the contest, 20 was open to EU all night (less so in the mornings and noontimes here), and 10 saw some excellent openings to Asia/Pacific, but there was no significant EU opening on 10 and nothing at all there in the local morning, which is when 10 really gets hot at the cycle peaks. 80 was not runnable from here and 160 was still more or less dead. Still, I did manage some 382 6-pointers, which kept my score at least close to 2012. So I'm hoping this one USA SOABLP record I still hold will stand (after the debacle that was CQWW CW for me, arriving 3 hours late and thus losing the record). At least, for sure \*I\* didn't break it (after log checking). But no guarantees! Congrats to friends/rivals N5AW and NV1N (N1UR), to all who travelled to put some exotic prefixes on the air, and to those who arranged some right there at home. Thanks especially to the contest committee and to contest director (and longtime SOLP aficionado) Terry, N4TZ/9. Thanks also to all my friends who called in from around the world, especially from G-land where I used to live (and may yet again one day). Looking forward to the next 5-Star DXers trip with many of you guys (details forthcoming one of these days). And while I'm at it, GO PVRC!!! Just one more thing...should this prove, for any reason, to be the end of my serious SOLP contesting days, it's been a blast and I can't thank you all enough! 73 and thanks for all the Qs and all the great competition, Maury W3EF....**W3EF**. Thank you....**W4JHC**. Licensed 12-22-11....**W4TTM**. Elecraft K3 100w to home made vertical trap dipole....**W6/SM5CSS**. This was the weekend I had to do a major repair on my SteppIR antenna. Got it all fixed by Saturday afternoon, hence 12 hours op time!....**W6QU**. Now that contest is over I feel Aissted not the way togo.....so next year back to Unassisted. Atenna here is 2 el @ 70 feet 73 BoB WA1FCN....**WA1FCN**. Despite a graduation party, over sleeping on Saturday night, over time from my work from home job on Friday, and watching the Indy 500 race (of course!), I still got well over a million points! Life is good!....**WA6KHK**. 2014 CQWW WPX CW....**WN1GIV**. Surprising contest. Started out with low expectation because two "guest op" possibilities faded. So, I was "stuck" with my typical wet noodle which doesn't put much oomph to my "mighty 5 watts" the power of choice. However, within the first few minutes I heard VK6LW calling "CQ test" on 10 meters with few takers, so I called him on a lark. He about blew me out of his chair by answering. Though 15 meters was the "motherlode" band, 20 meters held up way past bedtime, which was quite pleasant to note. 40 was noisy from some nearby thunderstorm, so it was almost a bust. The gods of the ionosphere must have smiled upon us during this weekend! Tnx to the Michigan QRP club for the use of WQ8RP, an almost unique prefix in this test for the past few years. And thanks to the organizers, plus the many ops who pulled my signal out of the noise level by multiple queries of "NR?" As many of my friends have said "Operating with 5 watts isn't a skill - it's a test of the receiving skills of the other ops."....**WQ8RP**. Good conditions made this fun. Operated much more than I planned. Have never worked so many JAs for so many hours of the day on 15m. Call of World Radiosport Team Championship WRTC2014....**WR1TC**.

Used IC-745 100 watts, GP antennas. Best 73 all cu....**4K6FO**. IC-7410, GP....**4K8M**. qrp 10m-2W, 15m-3W, 20m/40m-5W, InvV, akkuKeyer. HM'94, 670m/asl, vy bad WX....**4O4SM**. wpx contest is a great contest. I think I am the only contesteer who participated from Sri Lanka....**4S7KM**. Rig: Elecraft K3 running 75 Watt Ant: 20mtr wire as Inverted-L up 12mtr....**5P2I**. Rig: K3 Power 50-Watte Ant: Yagi Dipole....**7K1CPT**. 7N2JZT/1 AS-008 Shikine island. I enjoyed this trip....**7N2JZT**. I enjoyed the contest....**7N4QCQ**. Location: Thondwe (near Zomba) KH74PN Malawi 7QNL was issued to me, despite several requests at MACRA for a 'normal' callsign. And yes, my license states 'amateur station'. Having worked huge pile ups on 40m a few hours before, at the start of the contest nobody came back on my CQs. After 30 mins silence I did some S&P but it resulted in problems at the other side. QSOs lasted several minutes to complete with too many '?'s sent by the other side. Reason: People were not able to log what they hear in the air! (?) After a few QSOs I was fed up and went to bed. The next morning, after a new attempt with LX7I, it still remained a disaster. QSOs with top stations and top operators lasted several minutes to complete. Not because of the signal strenghts but simply the the inability to log four digits you hear in the air: 7QNL What should I do? After a QSO with LX7I I was advised to insert a number after 7Q to allow operators to log what they hear in the air. I chose 7Q0NL based on the preparatory work (Win-Test was patched, 7QNL was added to MASTER.DTA, etc etc). After signing 7Q0NL everything ran smooth... including pile ups. Equipment: FT-857 + filters with home brew LDMOS solid state PA. Antennas: VDA's for 10, 15, 20m, deltaloop for 40m 1/4wl fed from the apex. 40m RX-antennas: four 'open' Beverages, each ca. 80m long. Participation in the contest was 'holiday style' with several mains outages during the contest, and normal life styles (sleep, dinner, being social etc.) Excuses to stations who were not able to finish our QSO after a power outage. After all the contest was fun, but the fundamental fact that nowadays one has to contest against databases and software left a bad taste in my mouth. 73, Remco 7QNL....**7Q0NL**. Using SD....**7S5Q**. I'm New CW Op....**7X2GK**. Not very good condition! But we enjoyed the contest very much. Thank you and see you next year!....**8J1ITU**. Happy to hand out the 8P6 prefix for a few....**8P6SH**. QTH Muskoe Isl. Loc: JO99BA....**8S0W**. Operated from 9A4M contest location Babino Brdo NR city of Sisak - JN85EI....**9A15BB**. On Saturday we had problems with 40M computer. For unknown reason QSO NO 738 and 740 are lost. We noticed that too late....**9A1A**. For any differences between serial numbers sent to me and how I received them, I do believe that errors was my. It was my first contest after more than 25 years of no ham activity at all! PSE look [www.hamqth.com/9A2CU](http://www.hamqth.com/9A2CU). TNX & 73!....**9A2CU**. Single wire, TH7DXX, FT-1000MP, 5W....**9A2U**. RIG: IC-718 ANT: Dipole PWR: 50W....**9A5ADI**. Thanks to all of You, for answering my calls !!!!....**9A8WW**. Could become a new Africa Record. Just old style. 1 TRX and one Vertical. Thanks to all callers....**9G5ZZ**. Enjoyed using SD in this contest....**9H1CG**. My Rig: Transceiver Yaesu FT-1000MP and VL-1000 Quadra Linear @ 400w. Antennas up 27m (HF) 2-el Lightning Bolt Quad (LF) Butternut HF2V Vert. Thanks to the Contest organizers. 73 to all from Borneo!....**9M6XRO**. THANKS FB WPX CW QSO CUAGN 73....**BA4SD**. Put your comments here. Use multiple lines if needed....**BG6LQV**. 2012-10-25....**BG6LQZ**. 2012-11-20 first got license....**BG9HKP**. Enjoyable as always despite frustrations with the absorption fade outs at times. OPERATORS: C4Z....**C4Z**. Enjoyed the contest with a good propagation despite some heavy and sudden qsb sometimes in a middle of qso. SOAPBOX: Thanks to everybody and see you next year....**CN8KD**. A new contest for me. Hope have a great time. 73 Frank....**CO2IR**. I came to our radioclub station so I could use the tribander antenna. Things were not as I planned, too much QRM at downtown!....**CO8ZZ**. Our QTH was on Culatra island, EU-145, Portugal close to the ocean which gave us great propagation thanks to the saltwater. As antennas we used a spider beam, a 40m delta loop, an 80m wire ground plane and a shortened 160m gp. Station was a K3 plus 500 watts FET amplifier....**CS2W**. FT-450 + 2el. Q....**D3AA**. TNX for the exciting Contest, see u next year. Vy 73 de Manfred, DC9ZP....**DC9ZP**. The first time over 100,000 points, nice, tnx....**DD0VS**. I worked with my K3, TH5DX and Dipol. The Condx were not the best, but fair with more QRN on sunday....**DF0BV**. TS590S - 100W - ANTENNA vertical Delta Loop (max. 10m up)....**DF1LX**. -....**DF3TE**. Rig: KX3/K2 5W, 3ele Minibeam, 2el Oblong, 40m Delta Loop, 80/160m Dipole Rig: KX3/K2 5W, 3ele Minibeam, 2el Oblong, 40m Delta Loop, 80/160m Dipole....**DF5RF**. SunSDR2 & PA with multiband dipole....**DF8JK**. -....**DH1PAL**. Used Elecraft KX3 with endfed halfwave vertical on 10m fibreglass pole. Contest keying done via Arduino based open source nanoKeyer (Winkey compatible) with K3NG firmware. Strange CONDX on 10m during this year....**DJ0MY**. 5Watts KX3 ZS6BKW-Dipole....**DJ2IA**. QRP 5 Watt from FT817 via tuner Z11 to off-center-fed dipole FD3 21m long, 8m high....**DJ3GE**. unfortunately no serious effort possible due to awkward health constraints....**DJ3WE**. K2, 12 Watt, Dipol....**DJ3XA**. RIG: KX3 with 100mW, rubber duck antenna just gave some multi to my neighbour....**DJ5MN**. Sri, no more time for contest....**DJ5QE**. My best result for ever....**DJ6TK**. licence since 05/02/2013....**DJ7MH**. Yaesu FT-1000MP, PA 400 Watt, Beam FB-DX506....**DK2AT**. Thanks for organizing this excellent contest....**DK3YD**. Thanks for a nice contest! Hpe cuagn sn! Vy 73 es gl! DK5ZX / Dieter ("Ter")....**DK5ZX**. date of first licence 30.11.2011....**DK6SP**. After pausing with the WPX CW for 3 years, this WPX now resulted in my best contest score ever! No wonder, as the condx were good, with (at least for me) incredible short skips on 15 and 10 m, and the high bands wide open till late in the night. I noticed that a nice feature of the WPX is that missing bands (in my case 160 m this year) isn't a handicap. The event is barely over, but I'm already looking forward to the next one!....**DK8NT**. Heavy QRN this time and also heavy thunderstorms. A flash hit the field behind the house. However - this time bad circumstances....**DL0GEO**. Bad CONDX, ANT and TX failure - can it be

worse?....**DL1EJM**. Great fun again this year and lots of crazy prefixes. Thanks to all who made it into my log. Cu, Tom....**DL1HBT**. 9 Watts, Magnetical Loop....**DL1JHQ**. We hope to see much more ham's next contest!....**JH07A**. [www.qsl.net/y03fca/hstc.htm](http://www.qsl.net/y03fca/hstc.htm)....**JH01PU**. Good conditions apart from on 10m which was not open to NA....**JH03W**. I brought usual SO2R equipment (Microham box, Auto BPF, etc) but

decided to operate SO1R as antennas at club station were not great. Compared to 2012, both QSOs and Mults are increased so as final score. However, points/QSO was down to just 2.00 due to the lack of low band as I did not have enough time to spend on lower band because of good 20/15m propagation even in night time. Equipment used: K3 160m: DP 80m: tuned 160m DP by K3 ATU 40m: DP 20/15/10m: 5 elements log periodic (a bit high SWR on 15/10m) 20/15/10m: C3 fixed at 70 deg (towards Eastern EU) Optibeam was still on the ground, waiting for repair..... Some interesting observations (not complaining though) 1. Some people start calling CQ without sending "?", "QRL?", or not listening at all. However, the fact these people move away after I was constantly working stations suggests they knew what they were doing! 2. Some people interested to get QSL card or simply work station called me several times so these are dupe QSO for me but they always send "001". 3. Creative people want to copy my call sign as "M15Z"! Thanks to JARS club for use of station. My next visit to the island will be at the end of September for RTTY contest. 73 Kazu M0CFW, M5Z, JK3GAD....**MJ5Z**. Just giving some points away at times....**MM2N**. VERY CHALLENGING ON SATURDAY FUN ON SUNSAY....**MU0FAL**. Great contest and first time active with my new Elecraft K3 ! Unfortunately not such good conditions like in the WPX SSB....**OE1CIW**. Nice contest, but too much QRN on low bands....**OE2LCM**. final test for WRTC 2014, main goal to verify and optimize our setup was achieved, still had fun giving out some points for BCC....**OE2S**. Band quite OK at times. Had to close down on Saturday evening while band still open, because of approaching thunderstorm. Breaks: 1=0007z-0403z, 2=2246z-0200z, 3=0229z-0536z, 4=1139z-1313z 3h57min, 3h15min, 3h08min, 1h35min = 11h55min FOR LOGCHECKERS: I've marked QSOs #1427-1428 with X-QSO to give but FOR LOGCHECKERS: not claim credit for them. My break periods were FOR LOGCHECKERS: otherwise 5 minutes too short....**OG0A**. Nice to have also 10 m open a bit as well as 15 m, but 20 m was again the main band. Good opening to NA on 20 m. Thunder storm made Sunday afternoon with forced off hours....**OG300J**. The conditions were poor at the beginning and the start was very slow. Later on Saturday there were nice openings to Asia and USA. In the night a thunderstorm forced me to take an unwanted rest period during the best US conditions. Sunday was very slow and in practice I didn't get any run going any more. I knew the best conditions are during summer often after our sunset but I went QRT already 18 UTC. I had a normal working day on Monday. The timing of the rest periods wasn't optimal. However I broke the SO(A)SB15 OH record by almost 1,5 M points. Thanks for the QSOs! Timo OH1TM....**OH1F**. IC-756PROII, max. 100 W, 40/80m dipoles, 10/15/20m Yagis 545 QSOs, 859 p, 336 multipliers, score 288624 pts Op.time 15h39min....**OH2LU**. e-mail....**OH2YL**. A tough Low Power SOSB 15 effort this year. I made 90 % S&P but there was a lack of stations especially on Sunday. Poor conditions to Europe on both days. I missed most of the Italian and German pfx.. It's amazing that 72 % of the Q's I had were different prefixes. Great fun during our first cruise of the season aboard our sailboat "BellaDonna". I was surprised to work BY1AA and BY2AA on 15m using 100w and an insulated backstay! I have enjoyed this contest from the boat for over 20 years! 73 - Tony K2NV/VE3....**VE3/K2NV**. A busy weekend: work (on Saturday), wedding anniversary and, last and least, contest. Operating mode was an hour here, a quarter there and five minutes elsewhere....**VE3BR**. 5 watts & wires did not cut it this weekend. Daylight conditions were just poor enough to make operating painful. Sunday morning I gave it up and went out to joy the beautiful spring weather. Good thing I was only planning a part-time casual operation....**VE3VN**. Not much op time, but much fun. First time using computer to log as single op. Still not convinced....**VE3ZY**. Some serial number problems aound #112-115....**VE6LB**. Again this year CQ WPX was a lot of fun I got to put quite a few operating hours on a busy weekend. I got to give a Vintage FT-ONE Classic IC-751A and new FT-897D a good workout. I also like to participate in a few Vintage SSB nets on Sunday and get out and get exercise with my 86 Raieigh Mountain Bike....**VE7BGP**. Just dabbling but very enjoyable. 160 and 80 very poor....**VK2BJ**. Thanks to those who had enough patience to copy my QRP signals. It was very difficult with poor propagation....**VK2CCC**. had good fun in contest, prop was not the best here in vk, single op , single band 10m, learned a heap about cw, look forward to next contest....**VK4LAT**. G'day to all Ops in Test Used "SD" by EI5DI wk'd vy FB....**VK4TT**. Only on for about 4 hours. Only in to give out some numbers. FT-920, 100W, 20m delta loop @ 3m, multiband dipole @ 5m....**VK6WX**. Lots of Europe but couldn't get runs going into USA!....**VK7GN**. K2 on gel cell with longwire tossed out of Hong Kong high-rise QSO: 21000 CW 2014-05-

24 1109 VR2UU 599 1 SG7T 599 470 0....**VR2UU**. Very noisy and poor condx....**VU2BGS**. In spite of busy in other works I wanted to give some reports. I love CW and Contesting....**VU2MTT**. RIG: IC 718; ANTENNA: 5 BAND HEX BEAM; POWER 80W. HAD A GREAT CONTEST. THIS IS WHAT I WAS HOPING TO ACHIEVE SOME DAY. A GOOD ANTENNA AND GOOD TIME AT THE RADIO. AFTER A VERY LONG WAIT FINALLY THE HEX BEAM WAS UP IN TIME FOR THE CONTEST WEEKEND!! AND WHAT A CONTEST. OPENED WITH ZF1A - CAYMAN ISLANDS - AN ATNO!! GOT 5 ATNO'S. FELT MY SCORE COULD HAVE BEEN BETTER - TOPPING 500 IF 10 M HAD NOT CLOSED OUT ON ME ON THE SECOND DAY. OVER ALL GREAT FUN AND WILL BE BACK FOR MORE....**VU2MUD**. CONDITIONS WERE GOOD. FEW COPIED ME....**VU2UR**. 10m was not the band to choose from up here. However Friday night the southern end of the Funny River Horse Trail fire came within 3 miles of my winter qth. Sunday afternoon the northern end of it came within 1/4 mile of my summer qth. It is now over 176,000 acres burned. I traveled between the two qth's during the weekend, 40 miles apart. My summer qth is in Kenai Keys if you care to read the news story at the URL below. I thought it prudent not too pursue a band change and get too excited on Friday afternoon. Joe WL7E <http://www.adn.com/2014/05/26/3487535/funny-river-fire-jumps-kenai-riv-r.html>....**WL7E**. GREAT CONTEST, ONE OF MY PERSONAL SCORES MADE. THANKS ALL WHO CALLED ME !
